

Overview

12V DC High-Low Control UB20

Characteristics

RAMFAN's long-life Battery Pak now with dual high-low speed control. Pulse width modulation extends battery life up to 8 hours in low setting yet gives a full 2.5 hours on high. Can be used with vehicle battery with optional connector. Built-in charger allows you to fully recharge the battery in 12 hours. Purge the area on high for 10 minutes, reduce to low speed (low-noise as well) and maintain fresh air for the whole work shift. Ideal for construction job sites to eliminate noisy gasoline-engine blowers.

- High-low control enables fast-purge ventilation and lower speed for maintaining safe work space
- High impact case includes battery and built-in charger for overnight charging
- Up to 10 hours of continuous operation
- Lightweight and portable
