

FLEXI NOZZLE ADAPTOR

Overview

Flexi nozzle adaptor for lance with $\frac{1}{4}$ " F inlet and outlet.

Characteristics

The Flexi Nozzle adaptor allows the operator to point a pencil/spinning jet nozzle in multiple positions on the end of a hand lance so it can be positioned in a sewer shaft and directed at a blocked branch line.

Once the pressure hits the flexible adaptor it locks in position. The problem area can then be quickly blasted out so you can get a standard jet hose up the branch line to clean the obstruction thoroughly.

Nozzle and lance must be ordered separately
