

Overview

Malnis nozzles are rotating, vibrant and compact. Thanks to the round head it offers a light vibration and therefore ideal for PVC pipes.

Characteristics

Rotary, light vibrating, compact round head nozzles. Thanks to the vibrating movement they can have a disruptive effect on sediments and deposits at the bottom of the pipeline, without requiring high operating pressures. The small and compact dimensions allow the use of these nozzles in small pipes (starting from DN 50 for 1/4" size). Wherever possible, it is recommended to use these nozzles in combination with the camera to monitor the operation and progress of the work.

WARNING: not to be used in porcelain stoneware pipes.

Technical Specifications

Inlet	3/8" F	1/2" F
Ø x L (mm)	30 x 56	35 x 63
Weight (kg)	0,21	0,35
Rotation Jets	1 x 90°	1 x 90°
Rear Jets	3 x 20°	6 x 25°
Inserts	M4x5	M4x5
Flow (lt/min)	40	40
Working DN (mm)	80-175	80-175
