

Overview

Manhole Entry Device

Characteristics

The MED allows workers to enter and exit small man-size openings while maintaining continuous ventilation. Without such a device, duct fills the manhole opening, preventing rapid entry and exit. Tightly integrated into the UB-line of confined space ventilation equipment, MED is quick to assemble and the swiveling elbow makes duct alignment easy.

Items

Part Number	Description
9550.01A	UB20 BLOWER 240V W/MED SYSTEM
9550.01-05	Manhole Entry Device for UB20 ventilator
9550.01-03	Quick couple canister w/1,5+ 4,6 mt of duct and coupler
