

Overview

Flexi nozzle adaptor for lance wight $\frac{1}{4}$ " F inlet and outlet

Characteristics

The Root Ranger nozzle in $\frac{1}{4}$ " or $\frac{3}{8}$ " is the optimum solution for removing roots, grease and debris from domestic pipes up to DN 150 mm.

It is a one-piece nozzle that can be assembled on site in 1 minute without the need of additional tools.

It has an optional inclined front jet for better penetration (this reduces the thrust by 15%).

Extremely effective, it is sold worldwide to plumbers who need effective pipe cleaning on the first try.

Beware of cheap copies. The original Root Ranger nozzle is manufactured by Mustang Nozzles Australia. It is made of high strengthened stainless steel and will last for many years.
