

Overview

Small nozzles are rotating, vibrating and compact. Thanks to the crowned head it offers a very aggressive vibration on sediments and deposits.

Characteristics

This nozzle is particularly suitable for the removal of **hard deposits**

- intended for pipes from 30 mm diameter
- due to vibrations of the nozzle hard deposits fall off the pipe walls
- highly wear-resistant stainless material of nozzle body
- maintenance free, replaceable nozzle inserts

Technical Specifications

Inlet	1/2" F
Weight (kg)	0,18
Length / diameter (mm)	50 / 30
Number of inserts	4
Pipe diameter (mm)	> 75
